PROFILE SUMMARY

Overall 6+ years experience in IT Industry In Various Cloud Services on Azure IaaS, PaaS, , Azure .Storage, Migrations, Landing zone Deployments, and Azure DevOps. . Cloud Security. Azure Infra services. Azure DevOps ARM templates. CI/CD Yaml Power Shell Scripting,

ROLES AND RESPONSIBILITIES

- **Microsoft Azure Certified** result-oriented professional with 5+ years of work experience in Azure DevOps Microsoft Cloud Technologies.
- Implementation of the Azure Infrastructure as per the Design such as Azure Virtual Machines, Azure Monitor, Azure Log Analytics, Key Vaults, Enabling Resource Locks, etc.
- Experience in Cloud migrations, Discovery, Assessments, and Cut-over plans from On-premises to Azure cloud
- Deploying Azure resources using Terraform/ARM templates scaling applications on Azure IAAS/PAAS/SaaS
- Implementing IAM role policies on the azure environment & RBAC roles in Azure
- Implementing Network and network services Virtual Networks, Azure Traffic Manager, Azure DNS, Application Gateway, Load Balancer, Point to Site Creation, Site to site Creation for global projects.
- Backup Vault Creation, Active Directory Migration On-premises AD to Azure AD.
- Configure diagnostics logs, Azure and alerts, for monitoring Azure resources.
- Representing the Infra Team in daily, weekly huddles with Management and Onshore Teams.
- Experience in Migrating workloads to Azure Cloud using ASR Such as Physical to Virtual (P2V), Virtual to Virtual (V2V,) and Azure Migrate.
- Responsible for creating the Cut-over plan prior to migration and coordinating the activity with End-customer parallel to the execution.
- Expertise in parallel on Azure Cloud Assessments for migrating Customer On-Prem workloads to Azure.
- The Cloud Assessments include various steps starting from installation of MAP Tool, ASR Deployment Planner on Client servers, Collection of Performance Counters data, discovering dependencies, providing recommendations about Right sizing and Migration, ROI Calculation, and providing the complete Documentation, to Customers. ⎫ Experience in working with US, UK, and Canada Clients.
- The C Assessments include various steps starting from installation of MAP Tool, ASR Deployment Planner on Client servers, Collection of Performance Counters data,

discovering dependencies, providing recommendations about Right sizing and Migration, ROI Calculation and providing the complete Documentation to Customers. ⎫ Experience in working the US, UK, and Canada Clients.

- Monitoring availability of Azure Servers and performing the Resource Health check and verifying their Logs, Status
- Hands-on experience on Azure Infra Services, Azure Migrations, Azure Architect Knowledge, Implementation, Azure Platform solutions of complex High-level solutions on Cloud.
- Expert in Implementing Azure DevOps CI/CD Strategy for Global customers.
- Expert in Implementing Azure WebApps & DB Platform as service solutions Azure.

TECHNICAL SKILLS

Azure, GCP , Azur Devops, GCP Cloud bulid & Spinnaker for CI-CD Automation

Azure DevOps, GCP Cloud build & Spinnaker, for CI-CD Automation
IAC with Terraform, Bicep & ARM Templates
Dockers & Kubernetes
Cloud Migrations ,Windows Server
Administration
Scripting& Automation with PowerShell

EMPLOYMENT HISTORY

Period	Employer	Location	Designation
September-2023To Till	**Persistent Systems Limited**	Pune	**Sr Azure DevOps**
July 2019 TO August-2023	HCL	Puna	**DevOps Engineer**

PROJECT PROFILES

Project # 1
Client : Anthem Insurance Inc., USA
Role : Sr Azure DevOps
Responsibilities:

- IAC With Azure Bicep & Terraform deployments
- Azure Devops CI-CD Yaml Pipelines in the cloud
- .NET/Java Applications build and deploy automation using CI-CD
- Azure CosmosDB, FunctionApp & Appservice Solutions

- GCP Cloud Run & GKE CICD automation using goocle CloudBuild.
- Python application deployment using Cloud Run.
- GKE Cluster monitoring using Stack Driver, Prometheus and Grafana
- Google cloud Source repo management & Auto Triggers.
- Docker images management in Google container registry (GCR)
- Azure App Service Deployments and App insights monitoring.
- proficiency in automating Azure DevOps test cases using Maven, Gradle, and Cucumber frameworks.
- Version Control with Git Hub and BitBucket
- Kubernetes and Container Orchestration
- Azure SQL DB and Data Sync
- Blue-Green deployments
- Azure Cognitive services, Form recognition studio
- Azure API Management Service
- Azure Security Services
- Azure Load testing with JMeter scripts
- Static Application Security Testing (SAST) using Veracode and integrating the solution with CI/CD

Project # 2
Client : Branch Banking & Trust, USA
Role : Sr **DevOps Engineer**
Responsibilities:

- Strong understanding across Google Cloud and Azure infrastructure components (Compute, storage, network, Security, and Cloud IAM) to deliver end-to-end Cloud architectures and designs.
- Analyse prospect requirements and establish parameters to ensure client receives the right solution
- Involved in creating SOP's and TSG's based on the project requirements.
- Experience in creating cross-zone, cross-region replications.
- Carry out all administration matters including, monitoring system performance, ensuring successful back up procedures and developing/ implementing disaster recovery procedures
- Azure Load balancer & Application gateway configuration.
- GCP Compute Engine, App Engine & Container Engine.
- AKS and GKE management.
- Windows failover clustering
- Server migration using Cloud Endure.
- AWS Elastic Container Service with Fargate and EC2.
- Database migration using DMS

Project # 3

Client : Worlds Window Group, USA
Role : **DevOps Engineer**

Responsibilities:

- Manage the infrastructure using multi cloud.
- Support and configuration of storage accounts, managed disks, load balancers, NSG's.
- GCP cloud storage services.
- Azure Bastion Service.
- Kubernetes Deployments, Service, Daemon Set, stateful sets, replicasets.
- Maintaining Microsoft pre-production Data Centre, component testing using VSTS, code repository, component testing for bug identification.
- Creating and managing CI-CD pipelines in Azure DevOps and cloud build.
- Creating cloud resources using terraform IAC.
- Experience in Service Now and ICM to track server's related alerts, user reported issues and maintain each & every activity till the closure of the ticket.

Project#4
Client: Mazda Motor Corporation USA
Role: Member of Technical Staff

- Deploying Azure resources using Terraform/ARM templates scaling applications on Azure IAAS/PAAS/SaaS
- Implementing IAM role policies on the azure environment & RBAC roles in Azure
- Implementation of the Azure Infrastructure as per the Design such as Azure Virtual Machines, Azure Monitor, Azure Log Analytics, Key Vaults, Enabling Resource Locks, etc.
- Used to do Troubleshoot on production issues and coordinate with engineering teams to streamline code deployment.
- Used to Conduct systems tests for security, performance, and availability.
- We used to create Classic and Yaml pipelines for build and deployments in Azure DevOps
- Used to Create the service connections in Azure Devops, managing azure repos, creating pull requests, and maintained branching strategies.

CERTIFICATIONS / TRAINING WORKSHOPS

- GCP Associate Cloud Engineer.
- AZ 900, AZ 104: Microsoft Azure
- AZ 70-533: Microsoft Azure Infrastructure Solutions.
- AZ-400: Microsoft Azure DevOps Engineer

EDUCATION

B. Tech in Kamala Institute of Technology &Engineering
